ARES NET PREAMBLE

Please read the reflector rules before using the new Ontario ARES reflector.
Begin linking any repeaters that are to be linked together for the net about 2 minutes
prior to net time. This will allow you time to establish whether the repeater is in use or
not. VE3UCR (521), VE3RBW (571), and the 9035 reflector. (9035 last so everyone in
Ontario doesn't have to listen to the links being brought up.) VE3ZRR defaults to "Link
ON".

Good evening everyone. This is _____ and my name is _____.

I would like to welcome you to the Renfrew County Amateur Radio Emergency
Services net. This net is held weekly at this time.

The purpose of this net is to provide the following services:

- to handle any emergency or formal traffic when required.
- to keep members current on upcoming events,
- and to enlist volunteers when a communications network is required.

We are looking for additional members. There is a place for everyone, regardless of
one's license class, radio equipment or physical ability. Members are encouraged to
attend training seminars and meetings whenever possible. We would welcome and
encourage anyone who is interested in joining ARES to contact an ARES member, or
visit us at our web-site, rcarc.ca. This is a controlled net and all traffic etc., should be
handled by your net controller, who again tonight is V_____, and my name is
_____.

Is there anyone with emergency or priority traffic? *(Pause, if nothing heard, continue.)*

I will now take check-ins from anyone, please come with your call sign, name, QTH,
and whether you have any traffic.

We will now close the Renfrew County Amateur Radio Emergency Services net. I
would like to thank everyone who joined us this evening. Please join us next week
when your net controller will be _____. I will now return the repeater to normal use.
73 to All.

***Be sure to drop any repeater links that you might have brought online for the net,
starting with the reflector (73 to drop).***
